DESIGN BY SIMONE MICHELI

Simplicity becomes matter and takes shape in new objects with curved, round, sensual and essential shapes.

The hallmark of Simone Micheli's signature.

A rational collection that goes beyond simple product design. A design that is never for its own sake, but always useful and functional. A very distinctive design with a strong identity and uniqueness.

A design capable of adapting to any type of living room.

Products conceived to find space in architectural systems for exteriors and interiors.

Conceived with the desire to be adventure companions for a thousand possible tales.

Conceived to become icons with a strong communicative meaning.

Simone Micheli founded the Architectural Design Firm by the same name in 1990 and in 2003, the design company "Simone Micheli Architectural Hero" with headquarters in Florence, Milan, Puntaldia, Dubai, Rabat and Busan. An icon of Made in Italy design in the world, Micheli's professional activity goes in multiple directions: from architecture to interior design, from visual to communication.

PH. Rossano B. Maniscalchi

“With my projects I wish to turn the complexities of the present into simplicity.”

PH. Claudio Visentini

4

“Standards must be renewed.”

DESIGN BY LUIGI SIARD

Functionality and aesthetics, care for details and study of proportions: these are the features that have made Luigi Siard the hand, the eye, the signature of Lyxo.

Under his pencil, plastic is transformed and becomes malleable, each time different. It is soft and essential for the Marvy bar counter, geometric and sharp for the Dot stool, but also fun and ironic for the new My and Tea table lamps.

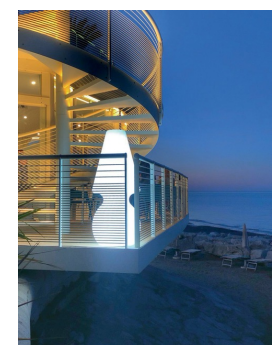

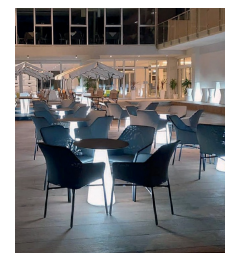

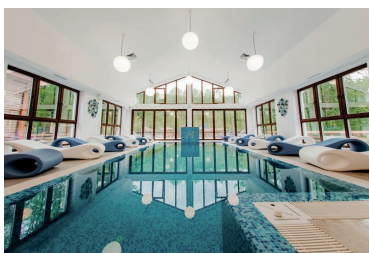

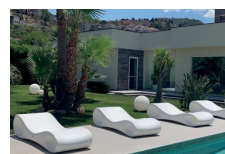

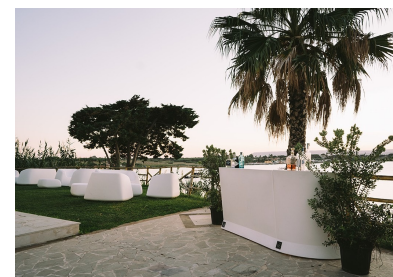

Sinuous waves of the clouds become the inspiration for the Nebula planter, flowers influence the design of the Assia Cache-pot. A versatility that makes the Lyxo collection suitable for any type of environment.

From design to production, Luigi develops all his projects with the main objective of giving a personal identity to industrial production.

Luigi Siard, after graduating from the Architecture section of Liceo Artistico and after obtaining the Masters in Industrial Design at SID, has worked for important Italian companies as a design consultant and designer of new product ideas. From porcelain to glass, from fabric to steel, plastic and marble: in more than twenty years he has created objects in the most different materials.

OUR CLIENTS.

The best way to talk about us is to show your spaces. This is where we give our best, so that you can distinguish yourself in style. Projects and achievements speak for us. They are the international hotellerie brands that have chosen us to confirm our quality. From Italy to the Seychelles, from Montenegro to Switzerland, we bring the Made in Italy technology and craftsmanship to the world.

Imagine a world without beauty. Impossible. That's what we think in Lyxo too, where we add beauty to every inch of space. It is not just a promise: it is an irrepressible urge that makes us look beyond. Beyond a furnishing, an example of style. Beyond a working method, an efficiency model. Beyond a completed project, a satisfied customer. In Italy and abroad, at Lyxo you will find more than a design excellence: in the garden, in indoor spaces, in your place of business, welcome a spot of plastic beauty.

QUALITY THAT COUNTS.

People determine success. Numbers prepare for it: we are part of Veca, a “Made in Italy” international brand that has been turning plastic into functional design for 30 years; 6 production plants with a total surface of 25.000 square meters, 40 innovative production machines both for injection and rotomoulding; exclusive use of 100% non-toxic and recyclable materials; 25 millions pieces and 10.000 orders managed every year. Numbers that count and tell who we are.

TECHNOLOGY, IN THE HANDS OF ARTISANS.

Without the hand of man, technology is just mass production. In Lyxo we are evolved artisans: rotomoulding is the technology that enables plastic mould to rotate on two axes at the right times and in a uniform and precise manner.

But it is only the human intervention that defines the finished product, thanks to thorough checks of shapes and details that must be perfect. Only then a beautiful product becomes a Lyxo product.

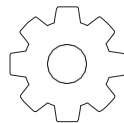

12

DESIGN. AND NOT JUST THAT.

RESEARCH: Beauty resists change and time. Like Lyxo products: designed and made to last.

DESIGN: Design is the act of drawing an idea. From its perfection comes the lines and shapes that makes a Lyxo product a unique one.

PASSION: If there is something more beautiful than our products, it's the pleasure of creating them for you, everyday.

A 360° VISION

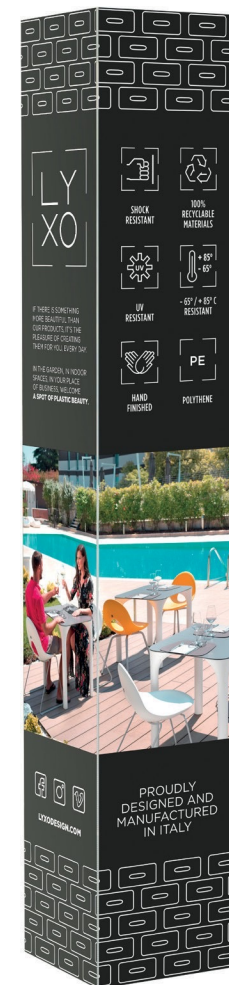

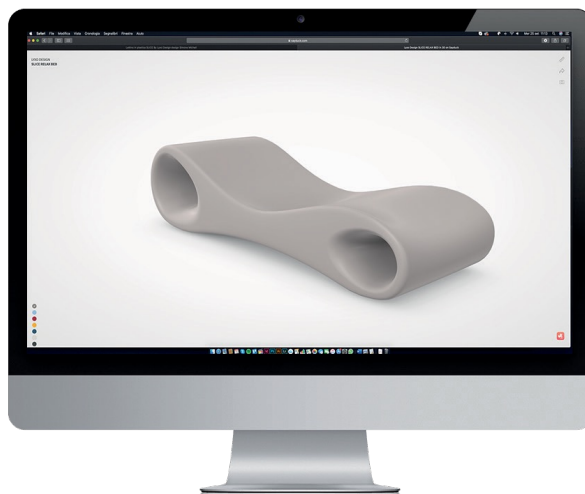

From augmented reality, to the web, to the point of sale: each space communicates the LYXO world. On the lyxodesign.com site, 3D models offer a 360 ° overview of the products, with the possibility of exporting them to other sites or graphics programs. In the mobile version it is possible to view

a selection of LYXO products in Augmented Reality in your environment and immediately check size, style and color, until you find the best positioning. LYXO is also present on Archiproducts, an architecture and design community, today the largest source of information and inspiration for architects, designers and retailers.

To make the outfitting of the store even more engaging, totems and graphic material are available to our retailers to present and enhance the brand.

archiproducts®

DESIGN. AND NOT JUST THAT.

LYXO is passion for beauty, responsibly designed and manufactured. For us it is of fundamental importance to create new sustainable and self-sufficient products, resistant, durable and in turn 100% recyclable, which balance quality, aesthetics and safety. For this reason, we have introduced a new material, deriving from a patented production cycle, the result of all-Italian research and technology, coming from post-consumer waste from certified sources, among which the most common is known as TetraPak.

17

LYXO, RESPONSIBLY MANUFACTURED.

Our products made with recycled material are certified with the “Plastic Second Life” brand, an environmental product certification system dedicated to the materials and artifacts obtained from the valorisation of plastic waste. Its neutral color is inspired by the tones and shades found in nature.

We believe that sustainability is a strategic approach that includes not only the choice of materials, but also the social component of each company, its responsibility towards the people and factories it involves every day. At Lyxo we are committed daily to making sustainability a reality in our production, logistics and management processes, to perfect and achieve respectful production, with the aim of having 0% waste.

Waste from containers

Lyxo Re.Life Products

We believe that one of the ways in which we can reduce our impact and be sustainable is to create recognizable and functional objects, made to last over time, not only because they are made with high quality materials and technologies that make them resistant and durable, but because they are always current in the form, with a timeless design, which does not go out of fashion, promoting a more conscious consumption, without waste.

And even when our products reach the end of their existence, or if they have production defects, they are treated with a shredding process and transformed back into polyethylene powder for the creation of new products, because we only use 100% recyclable plastic material.

No product has an impact on the air we breathe: The fusion of powders takes place without direct contact with flames or heat sources and no polluting gas or smoke is emitted. We have achieved the ambitious goal of using 100% renewable energy.

0% waste

100% Renewable sources

FURNITURE AND LIGHTS

EOS CHAIR

In Greek mythology, the name attributed to the goddess of the dawn. A chair of apparent simplicity, which fascinates thanks to its harmonious and sinuous style. The essential lines fit perfectly within modern and contemporary public or domestic spaces, both indoors and outdoors.

The polyethylene structure and stackability make it perfect for use in contract settings.

MELLOW CHAIR

Softness and fluidity, but also practicality and formal solidity. The polyethylene monocoque chair, without armrests and with a curved and ergonomic backrest, is a comfortable seat with a contemporary design that stands out in any environment.

24

DESIGN BY SIMONE MICHELI

26

PURE TABLE

A set of shapes, a perfect balance of volumes. Around the Pure table stories are told, relationships are created, people talk and live. Without ever forgetting elegance, taste and style.

DESIGN BY SIMONE MICHELI

27

PURE TABLE

The legs of the Pure table can be removed individually and are independent of each other. The HPL top is extremely resistant to water, dirt and wear, making it perfect for furnishing public spaces, both indoor and outdoor.

TWINS COAT HANGER

An inevitable piece of furniture with a contemporary, fresh and lively design, which distorts and updates the old idea of coat hangers, thus capable of capturing attention and furnishing trendy public spaces.

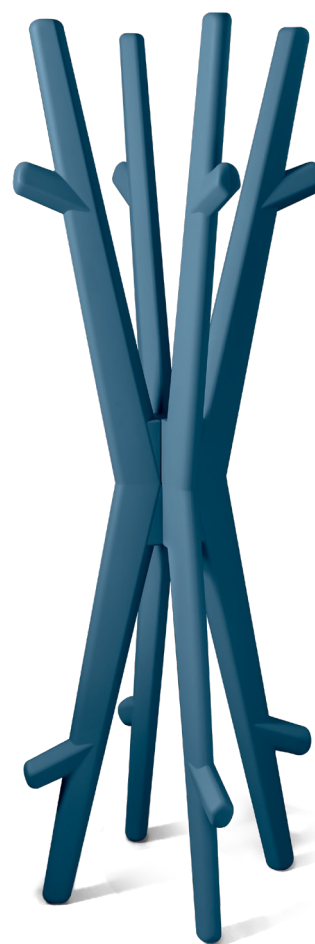

Easy to transport and to assemble: the two intersected pieces give the coat hanger stability and strength, but at the same time extraordinary lightness and resistance to both impacts and atmospheric agents, making it possible to install it even outdoors.

GROOVE DIVIDER

A play of fullness and emptiness, a group of frames that give life to pleasant geometric glimpses. A simple yet very versatile shape. In white or anthracite, it is a discreet and minimalistic divider. In the coloured version, it gives the right accent of eccentricity that any room could need. Ideal for dividing spaces and creating relaxation corners, both indoors and outdoors.

GROOVE DIVIDER

The divider is made of polyethylene, it is therefore easy to clean and resistant to atmospheric agents. Beautiful and elegant on its own, it creates a modular wall if placed in series. The single mould makes this divider a compact and easily movable accessory, for greater versatility. The self-supporting base makes it possible to create 90 degree angles and it can be ballasted.

COOKIE DIVIDER

Ideal to separate an environment in style, but above all with maximum comfort. Lightweight and easy to move, this partition is the practical solution to divide a room or to create a private hall, but also to make the atmosphere more dynamic and pleasant, with a playful “see-through” effect. Light and shadows draw the spaces, changing the perception during the day.

53

STRIPES LIGHT

Fashion, design and art, but also the search for a balance between functional, technical and aesthetic aspects. Stripes combines all of this to bring a unique design lighting experience to life. Stripes is an elegant chalice that illuminates and furnishes contract environments with a contemporary and classic flavor at the same time, becoming the focal point of the room. Its three-dimensional texture, defined by the timeless striped effect, gives it a sweetly retro, but always current flavor.

54

DESIGN BY LUIGI SIARD

STRIPES LIGHT

The Stripes lamp is a versatile object: sophisticated in indoor environments, the protagonist of entrances and gardens if placed outdoors, an exclusive and chic piece of furniture if used to light up events. The Stripes lamp is suitable for outdoors thanks to the IP65 degree of protection which makes it always efficient and safe in any weather condition. To increase stability or to fix the lamp on the floor you can buy four plates set. Fixing screws for lamp included, ground fixing screws not supplied.

BREEZE SET

The comfort of a breeze that envelops you, the elegance of a timeless design. Cozy lines and rounded shapes characterize the new set designed by Marcello and Luigi Siard. Inspired by the upholstered armchairs, a symbol of the 1980s, the Breeze armchair and sofa are carefully designed to allow maximum comfort for the guest. The linear and elegant design makes this set perfect for both outdoor private areas and the terraces of the most exclusive restaurants.

MAI TAI TABLE

Light, design and functionality are the ingredients that are dosed and mixed to make a perfect evening, just like the best cocktails. The result is an expressive object, which furnishes and illuminates with extraordinary simplicity. The conical-shaped base can be combined with the Dot stools, while the delicate integrated light creates a magical atmosphere for a truly contemporary bar area.

Continuous and prolonged exposure to sun rays may cause changes to the original finishing.

Rotomoulded products with straight walls may present some warpings that could become more evident if the item is exposed to direct and continuous sunlight.
